

Just Book It

Project Definition

Project Synopsis

- JBI will be a KISS multi-user web application for booking appointments with signed up users. Through a calendar widget and a form anonymous users can register for user defined time slots, which will be exportable as .ics files. Both ends will be notified by E-Mail about booking appointments and updated to them.

Project Scope Definition - MVP

In Scope

- Multi-user sign up and registration
- ICS export for appointments
- E-Mail through SMTP
- Simple security through email confirmation
- Minimalist frontend for easy embedding
- Configuring available times and blocking slots

Out of Scope

- Extensive permission management
- Vendor specific integration with E-Mail clients or providers
- CalDav

Wish list – Post MVP Tasks

- Mail provider integrations like calendar sync with outlook, gmail, etc.
